Comments: The UAA was conducted in June 2005, and no WBCR was observed. The stream did not meet the maximum depth criterion in any of the 5 sites but met the average depth criterion in 2 out of 5 sites evaluated. The maximum depth was close at 2 sites. No interviews were conducted. Because of the overall depth of the stream, the committee recommends retaining the WBCR designation.

Committee Recommendation: ☒ Retain Use ☐ Modify Use ☐ Remove Use ☐ Inconclusive
